Role Overview

Administrator Responsibilities

As a **System Administrator**, you have the highest level of access and responsibility in the ISM Sponsor Management System. Your role encompasses:

Primary Responsibilities:

-  Manage all sponsor records (create, edit, merge, delete)
-  Activate and deactivate Letters of Guarantee (LoGs)
-  Review and approve/reject change requests from Admissions staff
-  Manage system users and role assignments
-  Configure system settings (school years, students, items, coverage rules)
-  Monitor system health and integration status
-  Generate comprehensive reports across all areas
-  View complete audit trails
-  Handle duplicate sponsor resolution
-  Manage feedback and system issues

Key Capabilities:

-  **Full CRUD Access:** Create, Read, Update, Delete all records
-  **Approval Authority:** Final approval on all change requests
-  **System Configuration:** Manage users, roles, school years, coverage codes
-  **Operations Access:** Monitor system health, sync status, integration logs
-  **Merge Authority:** Resolve duplicate sponsors
-  **Override Capability:** Handle exceptional cases
-  **Audit Access:** View all system activity logs

System Access:

- All sponsor records across all school years
- All LoGs across all school years
- User management and role configuration
- System settings and configuration
- PowerSchool integration monitoring
- Complete audit log access
- All report types (Admin, Admissions, Cashier, Sponsor)

Getting Started

Initial Login

Figure 1.1: System login page with email and password fields

1. Navigate to System URL:

```
Production: https://ismsponsor.azurewebsites.net
Staging: [Your staging URL]
```

2. Enter Credentials:

- Email: your.admin@ism.edu.ph
- Password: [Your secure password]

3. Security Note:

- Change default password on first login
- Enable two-factor authentication (if available)
- Use strong password (12+ characters, mixed case, numbers, symbols)

4. Dashboard Access:

- Upon successful login, you'll see the **Admin Dashboard**
- Dashboard shows system overview and pending work

Navigation Overview

Main Navigation Bar (Top):

[Home] [Dashboard] [Sponsors] [Portal] [Reports] [Settings] [Operations]

Dashboard Navigation:

- **Home** → System landing page
- **Dashboard** → Admin dashboard with metrics and alerts
- **Sponsors** → Sponsor management (Settings/Sponsors)
- **Portal** → Letter of Guarantee management
- **Reports** → Admin Reports section
- **Settings** → System configuration
 - Users
 - Roles
 - School Years
 - Students
 - Items
 - Sponsors (management)
- **Operations** → System health monitoring

User Menu (Top-Right):

[Your Name ▼]

- └ Profile
- └ Feedback
- └ Logout

Interface Elements

Search & Filter:

- Most list views include search boxes and filters
- Search is case-insensitive
- Filters can be combined for precise results

Action Buttons:

-  Blue buttons = Primary actions (Create, Save, Approve)
-  Orange buttons = Secondary actions (Edit, Review)
-  Red buttons = Destructive actions (Delete, Reject, Deactivate)
-  Gray buttons = Cancel or back actions

Status Indicators:

-  Green badge = Active, Approved, Success
-  Yellow badge = Pending, In Review
-  Red badge = Inactive, Rejected, Error
-  Blue badge = Draft, New
-  Gray badge = Archived, Deprecated

Dashboard Guide

Admin Dashboard Overview

URL: </Dashboard/AdminDashboard> or </Dashboard>

Figure 2.1: Admin Dashboard showing system overview and key metrics

The Admin Dashboard provides a comprehensive view of system status, pending work, and key metrics.

Dashboard Sections

1. Key Statistics (Top Row)

Figure 2.2: Dashboard statistics showing key metrics at a glance

Statistics Card Layout:

Metrics Explained:

1. Active Sponsors:

- Total count of sponsors with `IsActive = true`
- Click card to view → </Settings/Sponsors>
- Shows trend (increase/decrease from last month)

2. Pending Requests:

- Count of change requests awaiting approval
- Click to review → </ReviewRequest/Index>
- ⚠ Alert indicator if > 5 pending requests

3. Active LoGs:

- Total Letters of Guarantee with `IsActive = true`

- Click to view → </Portal/Index>
- Filters by current school year by default

4. System Health:

- Overall system status percentage
- Click for details → </Operations/Dashboard>
-  Green = All systems operational
-  Yellow = Minor issues detected
-  Red = Critical issues require attention

2. Recent System Alerts

Alert Types:

Critical Alerts:

- Sync failures with PowerSchool
- Database connectivity issues
- Authentication service down
- Data integrity errors

Warning Alerts:

- High number of pending requests (> 10)
- Duplicate sponsors detected
- Inactive LoGs with recent activity
- Users with failed login attempts

Information Alerts:

- System updates available
- New features deployed
- Maintenance scheduled
- Report generation completed

Alert Actions:

- Click alert to view details
- Use "Dismiss" to remove from dashboard
- Critical alerts cannot be dismissed until resolved
- View all alerts → </Operations/Dashboard>

3. Pending Change Requests

Request Card Display:

Sponsor Name Change

Submitted by: admin.admissions@ism.edu.ph

Sponsor: Global Tech Corporation (SP-12345)
Submitted: April 22, 2026 2:30 PM
[Review] [Approve] [Reject]

Quick Actions:

- **Review:** View full request details
- **Approve:** Immediately approve request
- **Reject:** Open rejection form (reason required)

Request Details Include:

- Field being changed
- Current value vs. proposed value
- Submitting user and timestamp
- Business justification (if provided)
- Related sponsor information

4. Recent Activity Log

Shows last 10 system actions:

- User logins
- Sponsor creations/updates
- LoG activations
- Request approvals/rejections
- User management changes

Activity Entry Format:

 john.admin@ism.edu.ph
Approved change request for SP-12345
April 23, 2026 10:45 AM

5. Quick Actions Panel

One-Click Actions:

-  Create New Sponsor
-  Create New LoG
-  Review Pending Requests
-  Generate Admin Report
-  Manage Users
-  System Settings
-  View Operations Dashboard

Usage:

- Click any quick action to navigate directly
- Most-used actions for administrators
- Customizable (future enhancement)

Dashboard Refresh

Auto-Refresh:

- Dashboard auto-refreshes every 5 minutes
- Manual refresh: Click browser refresh or F5
- Real-time alerts appear without refresh

Performance Tips:

- Dashboard loads ~500ms on good connection
- If slow, check Operations for system issues
- Clear browser cache if experiencing issues

Sponsor Management

Overview

As Administrator, you have complete control over sponsor records including create, edit, merge, and delete operations.

Workflow 1: Create New Sponsor

URL: </Settings/Sponsors> → "Create New Sponsor"

Figure 3.1: Sponsors list view with search and filter options

Step-by-Step:

- 1. **Navigate to Sponsors:**
 - Dashboard → Settings → Sponsors
 - Or: Main Menu → Settings → Sponsors
- 2. **Click "Create New Sponsor"**

Create New Sponsor

Add a new sponsor organization with user account and verification document

Sponsor Information

SPONSOR ID *
e.g., ACME
Unique identifier for the sponsor

SPONSOR NAME *
Enter sponsor name

LEGAL NAME *
Enter legal business name

ADDRESS *
Enter complete address

TAX IDENTIFICATION NUMBER (TIN) *
Enter TIN

User Account Information

A sponsor user account will be created for this organization

USERNAME *
Enter username for login

DISPLAY NAME *
Enter display name

Figure 3.2: Create sponsor form with required fields marked

- 3. ***Fill Required Fields (marked with *):**

Basic Information:

Sponsor ID*: [SP-12345] ← Unique identifier (your format)

Sponsor Name*: [Global Tech Corporation] ← Display name

Legal Name*: [Global Tech Corporation Pty Ltd] ← Legal entity

Contact Information:

Contact Person*: [John Smith] ← Primary contact

Contact Email*: [john.smith@globaltech.com] ← Valid email

Contact Phone*: [+63 2 1234 5678] ← Phone with country code

Alternative Email: [info@globaltech.com] ← Optional

Alternative Phone: [+63 917 123 4567] ← Optional

Address Information:

Address Line 1*: [123 Ayala Avenue] ← Street address
Address Line 2: [Makati Finance Center] ← Building/Unit
(Optional)
City*: [Makati City]
State/Province*: [Metro Manila]
Postal Code: [1226] ← Optional but recommended
Country*: [Philippines] ← Dropdown selection

Status:

☒ Is Active ← Check for active sponsor

4. Click "Create" Button**5. Confirmation:**

- Success message appears: "Sponsor created successfully"
- Redirected to sponsor detail page
- Sponsor appears in sponsors list

Best Practices:**✓ Sponsor ID Convention:**

- Use consistent format: **SP-XXXXX** or company abbreviation
- Ensure uniqueness (system validates)
- Cannot be changed after creation

✓ Legal Name vs. Sponsor Name:

- **Legal Name:** Full official entity name (for contracts)
- **Sponsor Name:** Common/display name (for UI)
- Example: Legal = "ABC Corporation Pty Ltd", Sponsor = "ABC Corp"

✓ Contact Information:

- Use primary contact for official communications
- Alternative contacts for backup
- Validate email addresses before saving

✓ Address Completeness:

- Complete addresses help with mail correspondence
- Use international format for foreign sponsors
- Postal codes useful for sorting/reports

Common Mistakes:**✗ Duplicate Sponsor ID:**

- System prevents duplicate IDs
- If error appears, check existing sponsors first
- Use search to find similar sponsors

✖ Missing Required Fields:

- Form highlights missing fields in red
- Complete all * marked fields before submitting
- Email format must be valid (contains @)

✖ Inactive Sponsors by Default:

- New sponsors should be marked "Is Active"
- Inactive sponsors don't appear in most dropdowns
- Reactivate later if needed

Workflow 2: Search & Filter Sponsors

URL: </Settings/Sponsors>

Basic Search:

1. **Search Box (Top of List):**

[Search]

2. **Search Criteria:**

- Sponsor ID (exact or partial)
- Sponsor Name (case-insensitive)
- Legal Name
- Contact Person name
- Contact Email

3. **Search Tips:**

- Partial matches work: "tech" finds "Global Tech"
- Case insensitive: "ABC" = "abc" = "Abc"
- Email search: "john.smith" or full email
- ID search: "SP-12" finds SP-12345, SP-12346, etc.

Advanced Filters:

Filters:

Status:

[All ▼] [Active] [Inactive]

Country:

[All ▼] [Philippines] [USA] [Other]

Created:

[From:] [To:]

Modified:

[From:] [To:]

[Apply Filters] [Clear Filters]

Filter Combinations:

- Multiple filters work together (AND logic)
- Example: Active + Philippines = Active sponsors in Philippines
- Clear filters to reset view

Results Display:

Sponsor ID	Sponsor Name	Contact Person	Status	Actions
SP-12345	Global Tech Corp	John Smith	Active	[View]
SP-12346	ABC Corporation	Jane Doe	Active	[View]
SP-12347	XYZ Holdings	Bob Johnson	Inact.	[View]

Pagination:

- Results show 25 sponsors per page
- Use pagination controls at bottom: [[<< Previous](#)] [1] [2] [3] ... [[Next >>](#)]
- Shows total count: "Showing 1-25 of 245 sponsors"

Export Options:

- Click "Export to CSV" to download results
- Includes all filtered sponsors
- Use for reporting or analysis

Workflow 3: View Sponsor Details

URL: </Settings/Sponsors/Details/{id}>

Figure 3.3: Complete sponsor details page with all information and actions

Access Methods:

- 1. Click sponsor name from list
- 2. Click "View" button in actions column
- 3. Direct URL with sponsor ID

Details Page Sections:

B. Associated Letters of Guarantee

LoG List (By School Year):

School Year: [2025–2026 ▼]

LoG ID	Student	Coverage	Status	Actions
LOG-2526-01	Smith, John	Full Medical	● Active	[View]
LOG-2526-02	Doe, Jane	Tuition Only	● Active	[View]
LOG-2425-01	Smith, John	Full Medical	● Past	[View]

Summary: 2 active LoGs, 1 past LoG for this sponsor

C. Recent Activity

Shows last 10 actions related to this sponsor:

April 22, 2026 2:30 PM
Sponsor name changed from "Global Tech" to "Global Tech Corporation"
By: admin.admissions@ism.edu.ph

April 20, 2026 10:15 AM
Created new LoG LOG-2526-02 for student Doe, Jane
By: admin.admissions@ism.edu.ph

March 15, 2026 9:00 AM
Sponsor record created
By: admin@ism.edu.ph

D. Action Buttons

Edit:

- Opens edit form with current values
- Admin can edit all fields
- Changes are audited

View LoGs:

- Filters LoG list to this sponsor only
- Shows all school years
- Quick navigation to LoG details

View Audit Log:

- Complete history of changes
- Shows who, what, when
- Export capability

Deactivate/Activate:

- Toggle sponsor active status
- Confirmation required
- Inactive sponsors hidden from most views

Workflow 4: Edit Sponsor

URL: </Settings/Sponsors/Edit/{id}>

Step-by-Step:

1. **Navigate to Sponsor Details** (see Workflow 3)

2. **Click "Edit" Button**

3. **Edit Form Appears:**

- All fields populated with current values
- Sponsor ID is read-only (cannot change)
- Modify any editable field

4. **Fields You Can Edit:**

- Sponsor Name
- Legal Name
- Contact Person
- Contact Email
- Contact Phone
- Alternative Email
- Alternative Phone
- Address Line 1
- Address Line 2
- City
- State/Province
- Postal Code
- Country
- Is Active status

5. **Save Changes:**

- Click "Save Changes" button
- Validation occurs client-side then server-side
- Success message appears if valid

6. **Audit Trail:**

- All changes are logged with:
 - Username of editor
 - Timestamp of change
 - Old value → New value
 - Change reason (if provided)

Admin vs. Admissions Editing:

Administrator (You):

-  Can edit ALL fields directly
-  Changes take effect immediately
-  No approval required
-  Full audit trail maintained

Admissions Staff:

-  Cannot edit sensitive fields directly (Sponsor ID, Legal Name)
-  Must submit "Change Request" for sensitive fields
-  Can edit contact information directly
-  Change requests require your approval

Validation Rules:

Sponsor Name:

- 3-200 characters
- Required field
- Can contain letters, numbers, spaces, punctuation

Email Addresses:

- Must be valid email format (contains @)
- Duplicate emails allowed (multiple sponsors may share contacts)
- 254 characters maximum

Phone Numbers:

- Flexible format accepted
- Recommended: Include country code
- Example: +63 2 1234 5678 or (02) 1234-5678

Address:

- Address Line 1 required
- City, State/Province, Country required
- Postal Code optional but recommended

Common Edit Scenarios:

Scenario 1: Update Contact Person

```
Reason: Primary contact changed from John Smith to Jane Doe
Action:
1. Edit sponsor
2. Change Contact Person: "Jane Doe"
3. Change Contact Email: "jane.doe@globaltech.com"
4. Change Contact Phone: "+63 917 234 5678"
5. Save changes
Result: Contact updated immediately, audit log shows change
```

Scenario 2: Update Address

```
Reason: Sponsor relocated offices
Action:
1. Edit sponsor
2. Update Address Line 1: "456 New Street"
3. Update City: "Quezon City"
4. Update Postal Code: "1100"
5. Save changes
Result: Address updated, mail will be sent to new location
```

Scenario 3: Deactivate Sponsor

```
Reason: Sponsor no longer supporting students
Action:
1. Edit sponsor
2. Uncheck "Is Active" checkbox
3. Save changes
4. (Optional) Add note in audit log
Result: Sponsor hidden from active lists, LoGs remain visible but can't
create new ones
```

Workflow 5: Merge Duplicate Sponsors

URL: </Duplications/Index>

When to Merge:

- Two sponsor records represent same entity
- Data entry error created duplicate
- Sponsor reapplied with new ID

Warning: ⚠ Merging is permanent and cannot be undone. Ensure accuracy before merging.

Step-by-Step:

1. Navigate to Duplicates:

- Dashboard → Duplicates

- Or: Operations → View Duplicates
- System may auto-detect potential duplicates

2. Identify Duplicates:

- Search for both sponsor records
- Compare details carefully
- Verify they represent same entity

3. Select Primary Sponsor:

Which record should be kept as primary?

- SP-12345 | Global Tech Corporation
Created: March 15, 2026
LoGs: 5 active LoGs
- SP-12350 | Global Tech Corp (duplicate)
Created: April 10, 2026
LoGs: 2 active LoGs

[Keep SP-12345 as primary]

4. Review Merge Impact:

Merge Summary:

- Primary record: SP-12345 (will be retained)
- Duplicate record: SP-12350 (will be merged)

Actions that will occur:

- ✓ 2 LoGs from SP-12350 will be reassigned to SP-12345
- ✓ 7 total LoGs will belong to SP-12345
- ✓ SP-12350 record will be marked as merged (not deleted)
- ✓ Audit trail will show merge action
- ✓ All references updated automatically

⚠ This action cannot be undone!

5. Confirm Merge:

- Review carefully
- Type "MERGE" to confirm
- Click "Merge Sponsors" button

6. Post-Merge:

- Success message confirms merge
- Primary sponsor now has all LoGs
- Duplicate marked as merged (visible in audit)

- Reports and data reference primary sponsor

Best Practices:

✅ Pre-Merge Checklist:

- ☐ Verify both records represent same entity
- ☐ Check which has more complete data
- ☐ Review associated LoGs
- ☐ Verify no active pending requests on duplicate
- ☐ Confirm with stakeholders if unsure

✅ Choose Primary Based On:

- Most complete contact information
- Oldest creation date (original record)
- Most associated LoGs
- Best data quality

✅ After Merge:

- Notify Admissions staff of merged ID
- Update external systems if applicable
- Check reports for data consistency
- Verify LoGs transferred correctly

Common Merge Scenarios:

Scenario 1: Data Entry Duplicate

Situation: Admissions created SP-12345 (March), forgot, created SP-12350 (April)
Solution: Merge SP-12350 into SP-12345 (keep older record)
Result: All data consolidated under SP-12345

Scenario 2: Name Variation Duplicate

Situation: "Global Tech Corporation" vs "Global Tech Corp" (same entity)
Solution: Merge into record with full legal name
Result: Single sponsor record with complete information

Scenario 3: Reapplication Duplicate

Situation: Sponsor exited system (SP-12345 inactive), reapplied (SP-12400)
Solution: Reactivate SP-12345, merge SP-12400 into it
Result: Historical data preserved, new LoGs added to original record

Workflow 6: Delete Sponsor (Rare)

URL: `/Settings/Sponsors/Delete/{id}`

Warning:  **Deletion is permanent and should be avoided.** Use deactivation instead.

When Deletion is Appropriate:

- Sponsor created by mistake (no LoGs, no activity)
- Test data during system setup
- Duplicate with no historical value
- Data entered completely wrong (better to delete and recreate)

When NOT to Delete:

- Sponsor has any LoGs (active or past)
- Sponsor has audit history
- Sponsor referenced in reports
- You're unsure (use deactivate instead)

Step-by-Step:

1. **Verify Deletion is Appropriate:**

- Check sponsor has zero LoGs
- Check no pending requests reference this sponsor
- Verify no report data references this sponsor

2. **Navigate to Sponsor Details**

3. **Click "Delete" Button** (if available)

4. **Confirmation Dialog:**

⚠ Delete Sponsor: SP-12345 | Global Tech Corporation?

This action is permanent and cannot be undone.

Current status:

- Active LoGs: 0
- Past LoGs: 0
- Pending Requests: 0
- Audit Entries: 3

Are you sure you want to delete this sponsor?

Type "DELETE" to confirm: [_____]

[Cancel] [Delete Permanently]

5. **Type "DELETE" and Confirm**

6. Post-Deletion:

- Sponsor removed from database
- Cannot be recovered
- Audit log shows deletion action
- Redirected to sponsors list

Alternative to Deletion:

Use Deactivation Instead:

1. Edit sponsor
2. Uncheck "Is Active"
3. Save changes
4. Result: Sponsor hidden but data preserved

Benefits of Deactivation:

- Data retained for historical reports
- Can be reactivated if needed
- Audit trail complete
- References remain intact
- Safer approach

Letter of Guarantee (LoG) Management

Overview

As Administrator, you can create, edit, activate, deactivate, and delete Letters of Guarantee (LoGs). LoGs define coverage rules for sponsored students.

Workflow 7: View LoGs

URL: </Portal/Index>

Access Denied

You do not have permission to view this page.

Figure 4.1: Letters of Guarantee list with school year selector and filters

Access:

- Main Menu → Portal
- Dashboard → Active LoGs card
- Sponsor Details → View LoGs

LoG List View:

School Year Selector:

School Year: [2025–2026 ▼] [All] [2026–2027] [2025–2026] [2024–2025]

LoG List Table:

LoG ID Actions	Sponsor	Student	Coverage	Status
LOG-2526-01 [View]	Global Tech	Smith, John	Full Medical	● Active
LOG-2526-02 [View]	ABC Corp	Doe, Jane	Tuition	● Draft
LOG-2526-03 [View]	XYZ Holdings	Brown, Bob	Partial	● Active

Filters:

Status:

[All ▼] [Active] [Draft] [Inactive]

Sponsor:

[All ▼] [Search sponsors...]

Student:

[All ▼] [Search students...]

Coverage:

[All ▼] [Full] [Partial] [None]

Status Meanings:

- **Active:** LoG is active and coverage is in effect
- **Draft:** LoG created but not yet activated
- **Inactive:** LoG deactivated (historical record)
- **Pending:** Awaiting review (if workflow enabled)

Workflow 8: Create New LoG

URL: </Portal/Create>

Figure 4.2: Create LoG form - School year and sponsor selection

Prerequisites:

- Sponsor must exist (create sponsor first if needed)
- Student must exist (sync from PowerSchool or manual entry)
- School year must be configured

Step-by-Step:

1. **Navigate to Portal:**

- Main Menu → Portal
- Click "Create New LoG"

2. **Select School Year:**

School Year*: [2025–2026 ▼]

⚠ **Important:** Verify correct school year selected!

3. **Select Sponsor:**

Sponsor*: [Search or select... ▼]
[SP-12345 | Global Tech Corporation]

- Search by sponsor ID or name
- Only active sponsors shown
- If sponsor missing, create sponsor first

4. **Select Student:**

Student*: [Search or select... ▼]
[123456 | Smith, John – Grade 10]

- Search by student ID or name
- Shows: Student ID | Last Name, First Name – Grade Level
- Only students in selected school year shown

5. **LoG Details:**

LoG Number:	[LOG-2526-01]	← Auto-generated or manual
Issue Date*:	[04/23/2026]	← Date LoG issued
Effective Date*:	[08/01/2025]	← Coverage start date
Expiry Date*:	[06/30/2026]	← Coverage end date
Coverage Type*:	[Full Medical ▼] – Full Medical (100% coverage) – Partial Medical (with rules) – Tuition Only – Custom	
Special Instructions:	[[[	

6. **Coverage Rules:**

Figure 4.3: Adding coverage rules to define what expenses are covered

Add Coverage Rules (Optional but Recommended):

Click "Add Coverage Rule" to define what's covered:

Rule #1:

Item Category:

[Medical ▼]

← What type of expense

Coverage Level:

[Covered ▼]

← Covered/Split/Not Covered

Percentage:

[100%]

← If split, what %

Notes:

[All medical expenses covered except cosmetic procedures]

[Remove Rule]

Rule #2:

Item Category:

[Tuition ▼]

Coverage Level:

[Covered ▼]

Percentage:

[100%]

Notes:

[Full tuition coverage]

[Remove Rule]

Rule #3:

Item Category:

[Dental ▼]

Coverage Level:

[Split ▼]

Percentage:

[50%]

Notes:

[50% coverage up to PHP 20,000 per year]

[Remove Rule]

[+ Add Another Rule]

7. Attachments (Optional):

Upload LoG Document: [Choose File] [No file chosen]

Accepted formats: PDF, DOC, DOCX, JPG, PNG
Maximum size: 10 MB

8. Save as Draft or Activate:

Option A: Save as Draft

- Saves LoG but doesn't activate coverage
- Can edit later before activation
- Useful for review process
- Click "Save as Draft"

Option B: Save and Activate

- Saves and immediately activates LoG
- Coverage becomes effective
- Cannot edit certain fields after activation
- Click "Save and Activate"

9. Confirmation:

✅ LoG Created Successfully!

LoG ID: LOG-2526-01
Sponsor: Global Tech Corporation
Student: Smith, John
Status: Active

[View LoG Details] [Create Another LoG] [Back to List]

Best Practices:

✅ Date Validation:

- Effective Date should align with school year start
- Expiry Date should align with school year end
- Issue Date is typically date of creation
- Effective Date ≤ Expiry Date (system validates)

✅ Coverage Rules:

- Be specific about what's covered
- Use percentages for split coverage
- Add notes for clarification
- Common categories:
 - Medical (doctor visits, hospital, medication)

- Dental (cleanings, procedures)
- Tuition (full or partial)
- Books & Materials
- Uniforms
- Activities & Field Trips
- Laboratory Fees

✓ Coverage Type Quick Reference:

- **Full Medical:** All medical expenses 100% covered
- **Partial Medical:** Medical covered with rules/limits
- **Tuition Only:** Only tuition fees covered
- **Custom:** Define your own rules

✓ Special Instructions:

- Pre-authorization requirements
- Spending limits per category
- Excluded items
- Contact information for claims
- Special conditions

Common Scenarios:

Scenario 1: Full Sponsorship

```
Coverage Type: Full Medical
Rules:
- Medical: Covered 100%
- Dental: Covered 100%
- Tuition: Covered 100%
- Books: Covered 100%
- Activities: Covered 100%
Special Instructions: "Full sponsorship with no exclusion s"
```

Scenario 2: Medical Only

```
Coverage Type: Partial Medical
Rules:
- Medical: Covered 100%
- Dental: Covered 100%
- Tuition: Not Covered
- Books: Not Covered
- Activities: Not Covered
Special Instructions: "Medical expenses only. Tuition to be paid by
family."
```

Scenario 3: Split Coverage

Coverage Type: Custom

Rules:

- Medical: Split 80% (sponsor) / 20% (family)
- Dental: Split 50% / 50%
- Tuition: Covered 100%
- Books: Split 75% / 25%
- Activities: Not Covered

Special Instructions: "Cost-sharing arrangement. Family pays remaining balance."

Workflow 9: Edit LoG (Draft)

URL: </Portal/Edit/{id}>

When You Can Edit:

- LoG status is "Draft"
- All fields are editable
- No coverage has been claimed yet

Step-by-Step:

1. **Navigate to LoG Details** (see Workflow 7)
2. **Click "Edit" Button** (only visible if editable)
3. **Edit Form:**
 - Same fields as create form
 - Current values pre-populated
 - Change any field as needed
4. **Save Changes:**
 - Click "Save Changes" to keep as draft
 - Click "Save and Activate" to activate now
 - Changes are audited

Editing Active LoGs:

⚠ Limited editing for active LoGs:

- Cannot change: Sponsor, Student, School Year, LoG Number
- Can change: Special Instructions, Attachments
- To modify coverage rules: Must deactivate, edit, reactivate
- Or: Create new LoG for new school year

Workflow 10: Activate LoG

URL: </Portal/Activate/{id}>

Prerequisites:

- LoG must be in "Draft" status
- All required fields must be complete
- Coverage rules should be defined

Step-by-Step:**1. Navigate to LoG Details****2. Review LoG Information:**

- Verify sponsor is correct
- Verify student is correct
- Verify dates are accurate
- Verify coverage rules are complete
- Check special instructions

3. Click "Activate" Button**4. Confirmation Dialog:**

⚠ Activate LoG: LOG-2526-01?

Once activated, certain fields cannot be edited.

Current LoG Details:

- Sponsor: Global Tech Corporation
- Student: Smith, John
- School Year: 2025-2026
- Coverage: Full Medical
- Effective: 08/01/2025 to 06/30/2026

Are you sure you want to activate this LoG?

[Cancel] [Activate LoG]

5. Click "Activate LoG"**6. Post-Activation:**

- Status changes to "Active"
- Coverage is now in effect
- LoG appears in active reports
- Cashier can use for billing verification

What Happens When LoG is Activated:

-  Coverage rules take effect
-  Cashier can verify coverage against this LoG
-  Reports include this LoG

-  Student's sponsor information visible
-  Limited editing capabilities
-  Must deactivate to make major changes

Workflow 11: Deactivate LoG

URL: `/Portal/Deactivate/{id}`

When to Deactivate:

- Student leaves school mid-year
- Sponsor withdraws support
- LoG information needs major correction
- Coverage period ends early

Step-by-Step:

1. **Navigate to LoG Details**
2. **Click "Deactivate" Button**
3. **Deactivation Form:**

Deactivate LoG: LOG-2526-01

Reason for deactivation*: [▼ Select reason]

- Student Left School
- Sponsor Withdrew Support
- Coverage Period Ended
- Needs Correction
- Other (specify below)

Effective Deactivation Date*: [04/23/2026]

Additional Notes: [_____
[_____
[_____]

 Deactivating this LoG will:

- Stop coverage from effective date
- Mark LoG as inactive
- Retain all historical data
- Allow reactivation if needed

[Cancel] [Deactivate LoG]

4. **Click "Deactivate LoG"**

5. **Confirmation:**

 LoG Deactivated Successfully

LoG ID: LOG-2526-01

Status: Inactive

Deactivated: April 23, 2026

Reason: Sponsor Withdrew Support

[\[View LoG Details\]](#) [\[Back to List\]](#)

Post-Deactivation:

-  LoG marked as inactive
-  Coverage stops from deactivation date
-  Historical data preserved
-  Appears in reports as inactive
-  Can be reactivated if needed

Reactivation:

- Navigate to deactivated LoG details
- Click "Reactivate" button
- Provide reactivation reason
- Coverage resumes

Request Review & Approval

Overview

Admissions staff cannot directly edit certain sensitive sponsor fields. Instead, they submit **Change Requests** that require your approval as Administrator.

Workflow 12: Review Pending Requests

URL: </ReviewRequest/Index>

Figure 5.1: List of pending change requests requiring review

Access:

- Dashboard → Pending Requests card
- Main Menu → Review Requests
- Direct navigation to requests page

Requests List:

Req ID	Request Type	Sponsor	Submitted By	Date
CR-001	Name Change	SP-12345 Global	admin.admissions	04/22/26
CR-002	Address Update	SP-12346 ABC	staff.admissions	04/21/26
CR-003	Contact Update	SP-12347 XYZ	admin.admissions	04/20/26

Status Filter: [All ▼] [Pending] [Approved] [Rejected]

Request Types:

- **Name Change:** Sponsor name or legal name modification
- **ID Change:** Sponsor ID update (rare, requires strong justification)

- **Legal Name Update:** Legal entity name change
- **Major Address Change:** Complete address relocation
- **Merge Request:** Request to merge duplicate sponsors
- **Deletion Request:** Request to delete sponsor (rare)

Workflow 13: Approve Request

URL: </ReviewRequest/Details/{id}>

Step-by-Step:

1. Click "Review" on Request
2. Review Request Details:

Change Request: CR-001

Status: Pending Approval

Request Type: Name Change

Submitted By: admin.admissions@ism.edu.ph

Submitted Date: April 22, 2026 2:30 PM

Sponsor Information:

Sponsor ID: SP-12345

Current Name: Global Tech

Legal Name: Global Tech Corporation Pty Ltd

Requested Change:

Field: Sponsor Name

Current Value: "Global Tech"

Proposed Value: "Global Tech Corporation"

Justification:

"Sponsor requested we use their full formal name in all communications. Updated based on official document provided by sponsor contact."

Supporting Documents:

 sponsor_letter.pdf (uploaded 04/22/2026)

Administrator Action Required

This change will:

- ✓ Update sponsor display name in all interfaces
- ✓ Maintain LoG references (no LoG changes needed)
- ✓ Update reports to show new name going forward
- ✓ Preserve audit trail of name change

[Approve Request] [Reject Request] [Request More Info]

3. Review Checklist:

- ☒ Is the change justified?
- ☒ Is the justification clear and reasonable?
- ☒ Are supporting documents provided?
- ☒ Does the change make sense?
- ☒ Will the change cause issues elsewhere?
- ☒ Is the proposed value accurate?

4. Click "Approve Request"

5. Approval Form (Optional):

Approve Change Request: CR-001

Approval Notes (Optional):

[Approved. Name change aligns with sponsor's official documentation.]
[_____]

Notify Submitter: ☒ Send email notification

[Cancel] [Confirm Approval]

6. Click "Confirm Approval"

7. Post-Approval:

☒ Request Approved Successfully

Request ID: CR-001

Change has been applied automatically.

Updated:

- Sponsor Name: "Global Tech" → "Global Tech Corporation"
- Status: Approved
- Approved By: admin@ism.edu.ph
- Approved Date: April 23, 2026 10:15 AM

[View Sponsor Details] [Back to Requests]

What Happens After Approval:

- ☒ Change is applied immediately to sponsor record
- ☒ Request status changes to "Approved"
- ☒ Audit log updated with approval details
- ☒ Email notification sent to submitter (if enabled)
- ☒ Dashboard pending count decreases
- ☒ Change appears in activity feed

Workflow 14: Reject Request

URL: `/ReviewRequest/Reject/{id}`

When to Reject:

- Change is not justified
- Proposed value is incorrect
- Supporting documentation missing or inadequate
- Change would cause data integrity issues
- Better approach available (merge vs. edit)

Step-by-Step:

1. **Review Request Details** (see Workflow 13, steps 1-3)
2. **Click "Reject Request"**
3. **Rejection Form:**

Reject Change Request: CR-001

Reason for Rejection*: [▼ Select reason]

- Insufficient Justification
- Incorrect Proposed Value
- Missing Documentation
- Data Integrity Concerns
- Alternative Action Recommended
- Other (specify below)

Rejection Notes*: [_____] [Please provide more documentation showing]
[the official name change. Current letter]
[appears to be informal email, not official.]
[_____]

Recommended Action (Optional):

[Request official documentation from sponsor's legal dept.]
[_____]

Notify Submitter: ☒ Send email notification

⚠ Rejecting this request will:

- Not apply the change
- Mark request as rejected
- Notify submitter with reason
- Allow re-submission with corrections

[Cancel] [Confirm Rejection]

4. **Click "Confirm Rejection"**

5. Post-Rejection:

Request Rejected

Request ID: CR-001

Status: Rejected

Rejected By: admin@ism.edu.ph

Rejected Date: April 23, 2026 10:20 AM

Reason: Missing Documentation

Submitter has been notified and can resubmit with corrections.

[\[Back to Requests\]](#) [\[View Sponsor\]](#)

Best Practices:

✅ Provide Clear Feedback:

- Explain exactly why rejected
- Suggest what's needed for approval
- Be specific about documentation requirements
- Maintain professional tone

✅ Rejection Reasons:

- Must be constructive
- Should guide correction
- Include examples if helpful
- Reference policies if applicable

✅ Follow-Up:

- Check if request is resubmitted
- Review corrections when resubmitted
- Approve if corrections adequate

Workflow 15: Request More Information

URL: </ReviewRequest/RequestInfo/{id}>

When to Use:

- Need clarification on justification
- Need additional documentation
- Need confirmation from sponsor
- Need more context

Step-by-Step:

1. Review Request Details

2. Click "Request More Info"

3. Information Request Form:

Request Additional Information: CR-001

What information is needed?: [_____]
[Please provide official documentation showing the name]
[change, such as:]
[- Updated business registration]
[- Official letter from sponsor on letterhead]
[- Contract or agreement showing new name]
[]
[Current email is insufficient for official name change.]
[_____]

Due Date (Optional): [04/30/2026]

Notify Submitter: ☒ Send email notification

[Cancel] [Send Information Request]

4. Click "Send Information Request"

5. Post-Request:

Information Requested

Request ID: CR-001

Status: Awaiting Additional Information

Requested By: admin@ism.edu.ph

Requested Date: April 23, 2026 10:25 AM

Submitter has been notified.

Request will remain pending until information provided.

[Back to Requests]

Request Status Updates:

- Status changes to "Awaiting Information"
- Request remains in your pending queue
- Submitter receives email with details
- Submitter can respond via system
- You're notified when information provided
- Can then approve or reject

User Management

URL: /Settings/Users

As Administrator, you manage all system users including creation, role assignment, activation/deactivation, and password resets.

Workflow 16: View Users

Figure 6.1: User management list showing all users, roles, and status

Users List:

Email	Full Name	Roles	Status
admin@ism.edu.ph	John Admin	Admin	● Active
admin.admissions@ism.edu.ph	Jane Smith	Admissions	● Active
cashier@ism.edu.ph	Bob Jones	Cashier	● Active
sponsor@ism.edu.ph	Mary Sponsor	Sponsor	● Inact.

Filters:

Role: [All ▼] [Admin] [Admissions] [Cashier] [Sponsor]
Status: [All ▼] [Active] [Inactive] [Locked]
Search: [Search by name or email...]

Workflow 17: Create New User

Step-by-Step:

1. Click "Create New User"

2. User Creation Form:

Create New User

Email Address*: [new.user@ism.edu.ph]
(Will be used for login)

Full Name*: [First Last]

Role Assignment*: ☒ Admin
☐ Admissions
☐ Cashier
☐ Sponsor
(Select one or more)

Initial Password*: [_____] [Generate]
(User must change on first login)

Send Welcome Email: ☒ Send email with login instructions

Account Status: ☒ Active (user can login immediately)

[Cancel] [Create User]

3. Click "Create User"

4. Post-Creation:

✅ User Created Successfully

Email: new.user@ism.edu.ph

Roles: Admissions

Status: Active

Initial Password: TempPass123!

⚠ Share this password securely with the user.
User will be required to change password on first login.

[View User] [Create Another User] [Back to Users]

Password Requirements:

- Minimum 8 characters
- At least one uppercase letter
- At least one lowercase letter
- At least one number
- At least one special character
- Cannot be same as email or name

Workflow 18: Edit User

URL: /Settings/Users/Edit/{id}

What You Can Edit:

- Full Name
- Role assignments
- Account status (Active/Inactive)
- Email (with caution - affects login)
- Force password reset

Step-by-Step:

1. Click "Edit" on User
2. Edit Form:

Edit User: admin.admissions@ism.edu.ph

Email Address*:

[admin.admissions@ism.edu.ph]

⚠ Changing email changes login credentials

Full Name*:

[Jane Smith]

Current Roles:

☐ Admin

☒ Admissions

☐ Cashier

☐ Sponsor

Account Status:

☒ Active

☐ Inactive (prevents login)

☐ Locked (temporarily disabled)

Password Management:

☐ Require password change on next login

☐ Unlock account (if locked due to failed attempts)

[Reset Password] ← Generates new temporary password

[Cancel] [Save Changes]

3. Save Changes

Role Changes:

- User's permissions update immediately
- Current session remains active
- Changes apply on next login
- Can assign multiple roles (e.g., Admin + Admissions)

Account Status:

- **Active:** User can login normally
- **Inactive:** User cannot login (soft delete)
- **Locked:** Temporarily locked (failed login attempts)

Workflow 19: Reset User Password

When to Use:

- User forgot password
- Security concern (reset required)
- Account compromise suspected
- User's email changing

Step-by-Step:

1. **Navigate to User Edit Page**
2. **Click "Reset Password" Button**
3. **Password Reset Form:**

Reset Password for: admin.admissions@ism.edu.ph

New Temporary Password: [_____] [Generate]

- ☒ Require user to change password on next login
- ☒ Send password reset email to user

Reason for Reset: [▼ Select reason]

- User Requested
- Forgot Password
- Security Concern
- Other

[Cancel] [Reset Password]

4. Click "Reset Password"

5. Post-Reset:

 Password Reset Successfully

New Temporary Password: NewPass456!

 Share this password securely with the user.
Email sent to: admin.admissions@ism.edu.ph

User must change password on next login.

[Back to User]

[Back to Users List]

Security Best Practices:

- Generate strong temporary passwords
- Always require change on first login
- Communicate password securely (not via email)
- Log password reset in audit trail
- Consider sending reset link instead of password

Role Management

URL: /Settings/Roles

Manage system roles and their permissions.

Configuration Settings

School Years

URL: /Settings/SchoolYears

Manage academic years for the system.

Workflow 21: Manage School Years

School Years List:

School Year	Start Date	End Date	Status	Actions
2026–2027	08/01/2026	06/30/27	 Future	[Edit]
2025–2026	08/01/2025	06/30/26	 Active	[Edit]
2024–2025	08/01/2024	06/30/25	 Past	[View]

2023–2024	08/01/2023	06/30/24	Past	[View]
-----------	------------	----------	----------------------------	--------

Create School Year:

1. Click "Create New School Year"
2. School Year Form:

Create School Year

Academic Year*:

[2027–2028]

Format: YYYY–YYYY

Start Date*:

[08/01/2027]

End Date*:

[06/30/2028]

Description:

[Academic Year 2027–2028]

Status:

☐ Future (default for new years)

☐ Active (only one active at a time)

☐ Past (archived years)

[Cancel]

[Create School Year]

3. Click "Create School Year"

Best Practices:

- Create next year in advance (for planning)
- Set current year as "Active"
- Only one active school year at a time
- Past years should remain "Past" (read-only data)
- Start/End dates should align with actual academic calendar

Students Management

URL: </Settings/Students>

Manage student records (usually synced from PowerSchool).

Workflow 22: View Students

Students List:

School Year: [2025–2026 ▼]				
Student ID	Name	Grade	Status	Actions

123456	Smith, John	Grade 10	Active	[View]
123457	Doe, Jane	Grade 11	[View]	
123458	Brown, Bob	Grade 9	Active	[View]

Total Students: 423 (Showing 1–25)

Student Details:

- Student ID (from PowerSchool)
- Full Name (Last, First Middle)
- Grade Level
- Homeroom/Section
- Active/Inactive status
- Associated LoGs

Sync from PowerSchool:

- Click "Sync Students" button
- Pulls latest student data
- Updates existing records
- Adds new students
- Marks withdrawn students as inactive

Items Management

URL: </Settings/Items>

Manage billable items and coverage categories.

Workflow 23: Manage Items

Items List:

Item Code	Item Description	Category	Active	Actions
TUI-HS	High School Tuition	Tuition	Yes	[Edit]
MED-DOC	Doctor Consultation	Medical	Yes	[Edit]
MED-HOSP	Hospital Confinement	Medical	Yes	[Edit]
DEN-CLEAN	Dental Cleaning	Dental	Yes	[Edit]
BOOK-SET	Textbook Set	Books	Yes	[Edit]

UNI-SET	Uniform Set	Uniform	 Yes	[Edit]
---------	-------------	---------	---	--------

Create Item:

Create New Item

Item Code*:

[MED-LAB]
(Unique identifier)

Item Description*:

[Laboratory Tests]

Category*:

[Medical ▼]
- Medical
- Dental
- Tuition
- Books
- Uniforms
- Activities
- Other

Unit Price:

[1,000.00] (Optional, for reference)

Active:

☒ Yes

Notes:

[Standard laboratory tests (blood, urine, etc.)]

[Cancel]

[Create Item]

Usage:

- Items define what can be covered by LoGs
- Used in coverage evaluation
- Referenced in billing reports
- Synced with finance system

Reports & Analytics

Admin Reports Overview

URL: </AdminReports/Index>

As Administrator, you have access to comprehensive reports across all areas of the system.

Report Categories

1. Sponsor Reports

Available Reports:

A. Sponsor Master Report

- Complete list of all sponsors
- Status: Active/Inactive
- Contact information
- Address details
- Associated LoGs count
- Creation date
- Last modified date

Filters:

- Status (Active/Inactive/All)
- Country
- Creation date range
- Last modified date range

Export: CSV, Excel, PDF

Usage:

- Data audit and verification
 - Sponsor contact list
 - Mail merge operations
 - External reporting
-

B. Sponsor Contact List

- Sponsor ID
- Sponsor Name
- Primary Contact Person
- Contact Email
- Contact Phone
- Alternative contacts

Filters:

- Active sponsors only
- Country/Region
- Has active LoGs

Export: CSV, Excel

Usage:

- Communication campaigns
 - Annual surveys
 - Emergency contact list
-

C. Sponsor Activity Report

- Sponsor engagement metrics
- Number of students supported
- LoGs per sponsor
- Coverage amount (if tracked)
- Activity timeline

Filters:

- School year
- Activity level (High/Medium/Low)
- Coverage type

Export: CSV, Excel, PDF

Usage:

- Identify engaged sponsors
 - Recognition programs
 - Relationship management
-

2. LoG Reports

A. Active LoGs Report

- All active Letters of Guarantee
- Sponsor details
- Student details
- Coverage rules
- Effective dates

Filters:

- School year
- Sponsor
- Coverage type
- Grade level

Usage:

- Coverage verification
 - Billing reference
 - Audit purposes
-

B. LoG Expiration Report

- LoGs expiring soon (within 30/60/90 days)

- Requires renewal
- Proactive planning

Filters:

- Expiration date range
- Sponsor
- Grade level

Export: CSV, Excel

Usage:

- Renewal planning
 - Sponsor communication
 - Continuity assurance
-

C. Coverage Summary Report

- Aggregate coverage by sponsor
- Total students covered
- Coverage types breakdown
- School year comparison

Filters:

- School year
- Sponsor
- Coverage category

Export: CSV, Excel, PDF

Usage:

- Financial planning
 - Sponsor contributions analysis
 - Fundraising reports
-

3. System Reports**A. User Activity Report**

- User login history
- Actions performed
- Timestamp details
- IP addresses (if logged)

Filters:

- User

- Date range
- Action type

Export: CSV

Usage:

- Security audit
 - Compliance reporting
 - Usage analytics
-

B. Change Request Report

- All change requests
- Status (Pending/Approved/Rejected)
- Submitter
- Reviewer
- Processing time

Filters:

- Status
- Date range
- Submitter
- Request type

Export: CSV, Excel

Usage:

- Workflow analysis
 - Approval metrics
 - Process improvement
-

C. Audit Log Report

- Complete audit trail
- All system changes
- Who, What, When, Where
- Before/After values

Filters:

- Entity type (Sponsor/LoG/User)
- Date range
- User
- Action type (Create/Update/Delete)

Export: CSV, Excel

Usage:

- Compliance audits
- Data integrity verification
- Security investigation
- Historical analysis

Workflow 26: Troubleshoot Issues

Common Issues & Resolutions:

Issue 1: PowerSchool Sync Failure

Symptoms:

- Red status indicator on Operations Dashboard
- "PowerSchool Integration:  Disconnected"
- Students not updating

Troubleshooting Steps:**1. Check Integration Status:**

- Navigate to Operations Dashboard
- Review "PowerSchool Integration" section
- Note any error messages

2. View Sync Logs:

- Click "View Sync Logs"
- Look for error details
- Common errors:
 - Authentication failure (expired credentials)
 - Network connectivity issue
 - API rate limit exceeded
 - Data format mismatch

3. Verify Credentials:

- Navigate to Settings → Integration
- Check PowerSchool API credentials
- Verify URL, Client ID, Client Secret
- Test connection

4. Manual Sync Attempt:

- Click "Manual Sync Now"
- Monitor progress
- Check if successful

5. Contact Support If:

- Credentials are correct but sync still fails
- Error message unclear
- Issue persists after manual sync

Resolution:

- Update credentials if expired
- Retry sync after network issue resolved
- Contact PowerSchool support for API issues

Issue 2: Slow Performance

Symptoms:

- Pages loading slowly (>3 seconds)
- Database queries timing out
- Users reporting delays

Troubleshooting Steps:**1. Check Performance Metrics:**

- Operations Dashboard → Performance Metrics
- Review average response time
- Check database query times
- Identify slow queries

2. Database Optimization:

- Navigate to Settings → Database
- Run "Optimize Database" (if available)
- Update statistics
- Rebuild indexes

3. Clear Cache:

- Settings → System → Clear Cache
- Restart application if needed

4. Check Server Resources:

- Operations Dashboard → System Resources
- CPU usage
- Memory usage
- Disk space

5. Review Recent Changes:

- Check if issue started after update
- Review recent configuration changesSee audit log for system changes

Resolution:

- Optimize heavy queries
- Increase server resources if needed
- Rollback recent changes if needed
- Schedule maintenance window

Issue 3: User Login Issues**Symptoms:**

- Users cannot login

- "Invalid credentials" error
- Authentication service down

Troubleshooting Steps:

1. Verify User Account:

- Settings → Users
- Search for user
- Check account status (Active/Inactive/Locked)
- Check role assignments

2. Unlock Account (if locked):

- Edit user
- Check "Unlock Account"
- Save changes
- Notify user to try again

3. Reset Password:

- If user forgot password
- Click "Reset Password"
- Generate temporary password
- Send to user securely
- Require change on next login

4. Check Authentication Service:

- Operations Dashboard
- Verify "Authentication:  Operational"
- If red, check service status
- Restart if needed

5. Check Browser Issues:

- Clear browser cache/cookies
- Try incognito/private mode
- Try different browser
- Check for browser extensions blocking

Resolution:

- Unlock/reactivate account
- Reset password
- Restart authentication service
- Clear browser cache

Advanced Features

Bulk Operations

URL: </Settings/Bulk>

Perform bulk actions on multiple records simultaneously.

Workflow 27: Bulk Update Sponsors

When to Use:

- Update multiple sponsors at once
- Mass status changes (activate/deactivate)
- Bulk data corrections
- Address updates for related sponsors

Step-by-Step:

1. **Navigate to Bulk Operations:**

- Settings → Bulk Operations → Sponsors

2. **Select Sponsors:**

Bulk Update Sponsors

Selection Method:

- Select from list (pick individual sponsors)
- Filter-based selection (select by criteria)
- Import sponsor IDs from file

Filters:

Status: [Active ▼]

Country: [Philippines ▼]

Created From: [01/01/2025]

Created To: [12/31/2025]

[Apply Filters]

42 sponsors match these criteria

[Select All] [Deselect All]

3. **Preview Selection:**

Selected Sponsors (42):

SP-12345 | Global Tech Corporation

SP-12346 | ABC Corporation

SP-12347 | XYZ Holdings

... (39 more)

[Edit Selection]

4. Choose Update Action:

Bulk Action: [▼ Select action]

- Update Status (Activate/Deactivate)
- Update Country
- Update Address Field
- Add Note/Tag
- Export Selection

Selected: Update Status

New Status: ☐ Active
 ☒ Inactive

Reason: [Mass deactivation for fiscal year end]

⚠ This will update 42 sponsor records.
[Cancel] [Preview Changes] [Apply Bulk Update]

5. Preview Changes:

Preview: 42 sponsors will be deactivated

Example records:

SP-12345: Active → Inactive
SP-12346: Active → Inactive
SP-12347: Active → Inactive
...

⚠ This action cannot be undone for all records at once.
Consider testing with a small subset first.

[Cancel] [Apply to All 42 Records]

6. Apply Bulk Update:

- Click "Apply to All Records"
- Progress bar shows update status
- Completion message shows results

7. Review Results:

✅ Bulk Update Complete

Successfully updated: 42 records
Failed: 0 records

Details:

- 42 sponsors deactivated
- Audit log entries created: 42
- Time elapsed: 2.3 seconds

[\[View Updated Sponsors\]](#) [\[Download Report\]](#) [\[Back\]](#)

Best Practices:

✅ Test First:

- Test on a small subset (5-10 records)
- Verify results before full update
- Use "Preview Changes" feature

✅ Backup:

- Export current data before bulk update
- Keep backup for 30 days
- Document bulk changes

✅ Audit:

- All bulk updates are logged
- Individual audit entries per record
- Can trace bulk operation ID

❌ Avoid:

- Bulk updates without testing
- Updates during peak usage hours
- Updates without backup

Data Import/Export

URL: [/Settings/Import](#) or [/Settings/Export](#)

Import or export data in bulk using CSV/Excel files.

Workflow 28: Import Sponsors from CSV

When to Use:

- Initial system setup
- Migrate from old system
- Bulk sponsor addition
- Data restoration

Step-by-Step:

1. Navigate to Import:

- [Settings](#) → [Import](#) → [Sponsors](#)

2. Download Template:

Import Sponsors from CSV

Step 1: Download Template

[Download CSV Template] [Download Excel Template]

Template includes:

- Required fields (marked with *)
- Optional fields
- Field descriptions
- Example data

3. Prepare CSV File:

```
Sponsor ID,Sponsor Name,Legal Name,Contact Person,Contact Email,...
SP-12345,"Global Tech","Global Tech Corp Pty","John
Smith","john@global.com",...
SP-12346,"ABC Corp","ABC Corporation","Jane Doe","jane@abc.com",...
```

4. Upload File:

Step 2: Upload File

[Choose File] [sponsors_import.csv] [Upload]

File Requirements:

- Format: CSV or Excel (.xlsx)
- Maximum size: 10 MB
- Maximum records: 1,000 per file
- Encoding: UTF-8

5. Validate Data:

Step 3: Validation Results

File: sponsors_import.csv

Total Rows: 42

Validation Summary:

✅ Valid records: 40

⚠ Warnings: 2

❌ Errors: 0

Warnings:

Row 15: Postal Code missing (optional field)

Row 23: Alternative Email invalid format (optional field)

[Fix Warnings] [Proceed with Import] [Cancel]

6. Import Data:

- Click "Proceed with Import"
- Progress bar shows import status
- Results displayed upon completion

7. Review Results:

Import Complete

Successfully imported: 40 sponsors

Skipped (warnings): 2 sponsors

Failed (errors): 0 sponsors

Details:

- New sponsors created: 40
- Duplicate sponsors: 0
- Time elapsed: 5.2 seconds

Skipped Records:

Row 15: SP-12359 (missing postal code)

Row 23: SP-12367 (invalid email format)

[Download Full Report] [View Imported Sponsors] [Back]

Import Rules:

Duplicate Handling:

- System checks for existing Sponsor IDs
- Duplicate IDs are skipped by default
- Can choose to update existing records

Validation:

- Required fields must be present
- Email format validated
- Phone format flexible
- Dates must be valid format

Error Handling:

- Errors prevent import of that row
- Warnings allow import but flag issues
- Download error report for corrections

Workflow 29: Export Data

When to Use:

- Backup before major changes
- Data analysis in external tools
- Reporting to stakeholders
- Compliance requirements

Step-by-Step:**1. Navigate to Export:**

- Settings → Export → Sponsors

2. Configure Export:

Export Sponsors

Export Type: ☒ Full Export (all fields)
☐ Standard Export (common fields)
☐ Custom Export (select fields)

Filters:
Status: [All ▼] [Active] [Inactive]
Country: [All ▼]
Created From: [_____]
Created To: [_____]

Format: ☒ CSV
☐ Excel (.xlsx)
☐ JSON

Include: ☒ Include Associated LoGs count
☒ Include Last Modified date
☐ Include Audit History

[Generate Export]

3. Generate Export:

- Click "Generate Export"
- Processing message appears
- File downloads when ready

4. Download File:

 Export Ready

File: sponsors_export_20260423.csv
Size: 245 KB
Records: 245 sponsors

[Download File]

File will be available for 24 hours.

Export Options:

CSV:

- Plain text format
- Opens in Excel, Google Sheets
- Good for data analysis
- UTF-8 encoding

Excel:

- Native Excel format
- Formatted with headers
- Includes multiple sheets (optional)
- Formulas and formatting

JSON:

- Structured data format
- Good for API integration
- Developer-friendly
- Complete data structure

Troubleshooting

Common Issues & Solutions

Issue: "Access Denied" Error

Cause: Insufficient permissions for requested action

Solution:

1. Verify your role assignments
 - Navigate to Settings → Users
 - Check your user account roles
 - Confirm Admin role is assigned
2. If Admin role present but still denied:
 - Logout and login again
 - Clear browser cache
 - Check if account is active

3. Contact system administrator if issue persists

Issue: Cannot Create Sponsor - "Sponsor ID already exists"

Cause: Sponsor ID is not unique

Solution:

1. Search for existing sponsor with that ID
 - Use sponsor search
 - Enter the Sponsor ID
 - Review existing record
 2. Options:
 - **If same entity:** Use existing record, don't create new
 - **If duplicate:** Merge duplicate with existing
 - **If different entity:** Choose different Sponsor ID
-

Issue: LoG Cannot Be Activated

Cause: Missing required information or validation failure

Solution:

1. Review LoG details for completeness:
 - Sponsor selected?
 - Student selected?
 - Valid date range?
 - Coverage rules defined?
 2. Check validation messages:
 - Read error messages carefully
 - Fix indicated issues
 - Save and retry activation
 3. Common validation errors:
 - Effective Date after Expiry Date
 - Student already has active LoG for this sponsor
 - Sponsor is inactive
-

Issue: Report Shows No Data

Cause: Filters too restrictive or no data matches criteria

Solution:

1. Clear all filters
 - Click "Clear Filters"
 - Generate report again
 2. Check if data exists:
 - Browse to list view (e.g., Sponsors list)
 - Verify records exist
 - Check school year selector
 3. Adjust filters:
 - Broaden date range
 - Change status filter to "All"
 - Remove specific sponsor/student filters
-

Issue: Slow Performance When Loading Sponsors List

Cause: Large dataset, slow query, or browser issue

Solution:

1. Use search/filters to reduce results:
 - Search for specific sponsor
 - Apply status filter
 - Filter by date range
 2. Clear browser cache:
 - Browser Settings → Clear Cache
 - Hard refresh (Ctrl+F5 or Cmd+Shift+R)
 3. Check system performance:
 - Navigate to Operations Dashboard
 - Review performance metrics
 - Report if consistently slow
-

Issue: Changes Not Saving

Cause: Validation error, permission issue, or browser problem

Solution:

1. Check for validation messages:
 - Look for red error text

- Fix highlighted fields
- Ensure required fields complete

2. Check browser console:

- Press F12 to open developer tools
- Check Console tab for errors
- Screenshot errors for support

3. Try different browser:

- Test in Chrome/Edge/Firefox
- Disable browser extensions
- Try incognito/private mode

4. Verify account permissions:

- Confirm you have edit rights
- Check if account is active
- Verify not viewing read-only page

FAQs

General Questions

Q: What is my role as Administrator? A: As Administrator, you have the highest level of access including full CRUD operations on all entities, user management, system configuration, operations monitoring, and approval authority for change requests.

Q: Can I assign myself multiple roles? A: Yes, you can have multiple roles (e.g., Admin + Admissions). However, Admin role provides access to all features, so additional roles are usually unnecessary for Administrators.

Q: How do I change my password? A: Click your name (top-right) → Profile → Change Password. Follow the prompts to enter current password and new password.

Q: Can I undo a deletion? A: No, deletions are permanent. Use deactivation instead of deletion whenever possible to preserve data. Contact technical support immediately if accidental deletion occurs.

Sponsor Management Questions

Q: What's the difference between Sponsor Name and Legal Name? A:

- **Sponsor Name:** Display name used in the interface (e.g., "Global Tech")
- **Legal Name:** Full official legal entity name (e.g., "Global Tech Corporation Pty Ltd")

Both are required, and Legal Name is used for official documents.

Q: Can I change a Sponsor ID after creation? A: No, Sponsor ID cannot be changed after creation as it's the primary key. If you need to change it, you must create a new sponsor and merge the old one into it.

Q: How do I handle duplicate sponsors? A: Use the Merge Sponsors feature (/Duplicates/Index). Select the primary record to keep, then merge the duplicate into it. All LoGs and references will be transferred automatically.

Q: Can I delete a sponsor that has LoGs? A: No, sponsors with associated LoGs cannot be deleted. You must first remove or reassign all LoGs, then deactivate the sponsor instead of deleting.

LoG Management Questions

Q: What's the difference between Draft and Active LoGs? A:

- **Draft:** LoG created but not activated; fully editable; coverage not in effect
 - **Active:** LoG activated; limited editing; coverage is in effect; used for billing verification
-

Q: Can I edit an active LoG? A: Limited editing is available. You can update Special Instructions and attachments. To change coverage rules or other key fields, you must deactivate, edit, and reactivate the LoG.

Q: Can a student have multiple active LoGs? A: Generally no, a student should have one active LoG per school year from each sponsor. System may warn if creating duplicate LoGs for same student-sponsor-year combination.

Q: What happens when a LoG expires? A: The LoG automatically becomes inactive on the expiry date. Coverage stops, and it appears as "Past" in reports. You can create a new LoG for the next school year.

Request & Approval Questions

Q: Why do Admissions staff need to submit change requests? A: For sensitive fields (Sponsor ID, Legal Name), change requests provide an approval workflow to ensure data accuracy and prevent unauthorized changes. It adds an audit layer for important modifications.

Q: How long should I take to approve/reject requests? A: Aim to review requests within 24-48 hours. Urgent requests should be handled same-day. System alerts you if requests are pending for >3 days.

Q: Can I approve my own change requests? A: If you're an Administrator who also has Admissions role, technically yes. However, it's best practice to have another Administrator review for objectivity.

Q: What if I accidentally reject a valid request? A: The submitter can resubmit the request. Contact them to clarify the issue and request resubmission. Include guidance on what additional information is needed.

Reports & Data Questions

Q: Why don't my reports show data? A: Common reasons:

- Filters too restrictive (e.g., date range doesn't include data)
- Wrong school year selected
- No data matches criteria
- Status filter excluding relevant records

Clear all filters and try again.

Q: Can I schedule reports to run automatically? A: This feature is planned for future release. Currently, reports must be generated manually. You can export and save for regular distribution.

Q: What's the difference between export formats (CSV vs. Excel)? A:

- **CSV:** Plain text, universal compatibility, larger file size, no formatting
- **Excel:** Native Excel format, formatted headers, smaller file size, includes formulas

Choose CSV for data import/analysis, Excel for reporting/distribution.

Operations & Monitoring Questions

Q: What should I do if system health shows red status? A:

1. Check Operations Dashboard for specific error
 2. Review error details and logs
 3. Follow troubleshooting steps for that component
 4. Contact technical support if issue persists or is critical
-

Q: How often should I check the Operations Dashboard? A: Check daily during business hours, especially:

- Start of day (morning)
 - After system updates
 - When users report issues
 - Before/after bulk operations
-

Q: What is "slow query" and should I worry? A: A slow query takes longer than expected to return data (usually >1 second). Occasional slow queries are normal, but consistent slow queries may indicate:

- Database needs optimization
- Too much data being queried
- Server resources insufficient
- Indexes need rebuilding

Report if frequent (>10 per day).

Security & Access Questions

Q: How do I handle a compromised user account? A:

1. Immediately deactivate the account (Settings → Users → Deactivate)
 2. Reset password
 3. Review audit log for unauthorized actions
 4. Notify user and require re-authentication
 5. Reactivate after security verified
-

Q: Can users have accounts without roles? A: No, every user must have at least one role. Users without roles cannot access the system beyond the login page.

Q: How long are audit logs retained? A: Audit logs are retained indefinitely for compliance purposes. They can be exported for archiving. Logs older than 2 years may be archived to secondary storage for performance.

Data & Integration Questions

Q: How often does PowerSchool sync occur? A: Default sync schedule is daily at 6:00 AM. Admins can trigger manual sync anytime from Operations Dashboard. Customized schedules can be configured in Settings.

Q: What happens if PowerSchool sync fails? A:

- System retries automatically (3 attempts)
 - Error logged in Operations Dashboard
 - Admin notified via email (if configured)
 - Manual sync can be triggered
 - Student data remains at last successful sync state
-

Q: Can I manually add students without PowerSchool? A: Yes, navigate to Settings → Students → Create Student. However, manual students may be overwritten on next PowerSchool sync. Best practice is to add students in PowerSchool first.

Best Practices Questions

Q: What should I do before performing bulk operations? A:

1. Export current data (backup)
2. Test on small subset first (5-10 records)
3. Verify results of test
4. Schedule during low-usage time
5. Notify users of potential brief impact

6. Proceed with full bulk operation
 7. Verify results and rollback if needed
-

Q: How often should I backup data? A:

- Automatic backups: Daily (configured by IT)
 - Manual exports: Weekly for critical data
 - Before major changes: Always export relevant data
 - Before bulk operations: Always export affected records
 - Before system updates: Full system backup
-

Q: What naming convention should I use for Sponsor IDs? A: Choose a consistent format and stick to it:

- **Option 1:** SP-XXXXX (e.g., SP-12345)
- **Option 2:** Company abbreviation (e.g., GLOBALTECH-001)
- **Option 3:** Sequential with prefix (e.g., SPNSR-2026-001)

Document your convention and train all admissions staff to follow it.

Support Questions

Q: How do I get help if I'm stuck? A:

1. Check this user manual (search for topic)
 2. Check in-app help (? icon)
 3. Submit feedback (Your Name → Feedback)
 4. Contact technical support (support email/phone)
 5. Check system status page (for outages)
-

Q: How do I report a bug? A:

1. Click Your Name → Feedback
2. Select "Report Bug"
3. Describe issue with details:
 - What you were trying to do
 - What happened instead
 - Steps to reproduce
 - Screenshots if helpful
4. Submit feedback

Technical team will investigate and respond.

Q: How do I request a new feature? A:

1. Click Your Name → Feedback
2. Select "Feature Request"
3. Describe desired feature:

- What problem it solves
 - How it would work
 - Who would benefit
 - Priority/urgency
4. Submit feedback

Feature requests are reviewed quarterly for roadmap planning.

Conclusion

This Administrator User Manual provides comprehensive guidance for all administrative functions in the ISM Sponsor Management System. As an Administrator, you have significant responsibility and authority to maintain data integrity, approve changes, manage users, monitor system health, and ensure smooth operations.

Key Takeaways

Your Authority:

- Full access to all system functions
- Approval authority for change requests
- User and role management
- System configuration
- Operations monitoring

Best Practices:

- Always verify data before approval
- Use deactivation instead of deletion
- Export data before bulk operations
- Monitor system health daily
- Document significant changes
- Maintain audit trail integrity

Security:

- Protect your administrator credentials
- Review user access regularly
- Monitor audit logs for unusual activity
- Use strong passwords
- Enable two-factor authentication (if available)

Support:

- Reference this manual for guidance
- Use in-app help resources
- Submit feedback for issues or requests
- Contact technical support when needed

Next Steps

1. **Familiarize with Interface:**

- Explore all menu sections
- Practice common workflows

2. **Review Current Data:**

- Check existing sponsors
- Review active LoGs
- Verify user accounts

3. **Configure Settings:**

- Verify school years
- Check integration status
- Review system settings

4. **Daily Operations:**

- Monitor dashboard
- Review pending requests
- Check system health
- Respond to alerts

5. **Regular Maintenance:**

- Weekly: Review pending requests, check audit logs
- Monthly: User access review, data quality check
- Quarterly: System optimization, user training
- Annually: Archive old data, system audit
